

DALLA PIETA' 59 FLY

TECHNICAL SPECIFICATIONS

Shipyard:	DALLA PIETA'
Model	DP 59 FLY
Designer:	CARLO TREZZI / DALLA PIETA'
Year of construction / registration:	2008 / 2010
Length:	17,82 m.
Beam:	4,87 m.
Draft:	1,42 m.
Displacement:	31600 kg
Engines:	MAN V8 900 Hp
Running hours:	1900
Transmission:	Shaft line V drive
Generator:	Kohler 13 Kw
Cabins:	3 + crew
Berths:	6 + 1
Water tank:	830 lt.
Fuel tank:	2900 lt.
Flag:	Italian
Location:	Sicily
Price:	€ 500.000,00 VAT PAID

DESCRIPTION

Dalla Pietà represents one of the few realities in the Italian shipbuilding industry that has chosen to maintain a handcrafted and authentic approach to construction, avoiding the adoption of highly automated industrial processes.

This Venetian shipyard has consolidated its reputation over the years with successful and prestigious yachts characterized by high-quality finishes and utmost attention to detail.

Among the models that have contributed to the notoriety of this brand, the flying bridge models stand out, particularly the DP 59: a yacht that combines a modern, streamlined design with classic and refined interiors, customizable upon request.

The design of the DP 59 is the result of collaboration between architect Carlo Trezzi and the shipyard itself.

This eighteen-meter hull accommodates three cabins, each with an ensuite bathroom, in addition to a crew cabin with a separate bathroom located at the stern.

In the engine room, every detail has been considered to facilitate checks and maintenance.

The main power supply for the utilities is 24 volts, with dedicated batteries for services and engines.

This yacht is equipped with two Man V drive engines, V8 900 horsepower, delivering high navigation performance and reaching a maximum speed of 27 knots.

EXTERIORS

Regarding the exteriors, the areas are designed to be practical and functional, featuring a spacious cockpit that offers generous space ideal for outdoor relaxation.

The integrated stern platform is wide and accommodates a 3-meter tender.

At the bow, a cozy sunbathing area with a shaped mattress, is perfect for enjoying the cruise.

On the flybridge, the layout includes a comfortable seating arrangement for six people with a table and a lovely sunbathing area near the helm station.

The area is equipped with every comfort, including a refrigerator, bar, sink and barbecue grill.

INTERIORS

As a natural continuation of the cockpit, a spacious salon welcomes its guests, well-equipped with ample storage cabinets. This area is generous and comfortable, featuring a beautiful white leather sofa and an extendable table.

Moving forward, we find two distinct areas with the kitchen positioned on a lower level compared to the salon.

The compact and functional kitchen features easily accessible components and numerous storage spaces; it is complete with a stainless steel sink, Candy induction cooktop, refrigerator, dishwasher, and multifunction oven.

Additionally, a convenient pantry is located under the stairs, housing the freezer and washer-dryer.

The dinette, with its beautiful semicircular leather sofa, can accommodate up to four people.

The helm station is ergonomic, with instruments that are clearly readable, offering excellent visibility thanks to the large windshield.

The sleeping area consists of three double cabins, each with a private bathroom, all spacious and well-furnished.

The owner's cabin is located at the bow, featuring an ensuite bathroom with a shower box.

The two twin cabins are mirror images in size and decor.

All mattresses have been replaced with new ones.

The use of cherry wood combined with finely crafted paneling, along with light fabrics, gives the environment a distinctive and casual elegance.

The care and precision in the realization of the interiors, highlighted by the combination of various decorative elements, deserve special attention.

EQUIPMENT

Electronics and instruments

- Raymarine plotter at the main helm
- Simrad plotter on the flybridge
- Raymarine/Simrad depth sounder
- Raymarine autopilot
- Simrad VHF with dual station
- Chart plotter GPS
- Magnetic compass
- Onboard Internet/Wi-Fi system

Propulsion and maneuvering

- Side Power bow thruster
- Side Power stern thruster
- Traditional V-Drive shaft line
- Professionally balanced propellers

Safety equipment

- Compliant fire suppression system
- 2 liferafts
- Ring buoys with lights

- Horn and bell
- Day and night signals
- Regulatory flares
- Parachute rockets
- First aid kit according to Table D
- Life jackets
- Black mooring ball
- Regulatory navigation lights
- Emergency engine stop system

Entertainment

- Onboard Internet/Wi-Fi system
- New TVs in all cabins and the salon

Extras

- EV 325 tender with Mercury 4 HP engine

WORKS

Main works performed between 2022 and 2025

- Interventions on propulsion systems, transmission, and engines, including complete servicing, cleaning, and overhauls.
- Maintenance of the shaft line and propellers, including professional balancing.
- Complete overhaul of the flap pumps and pistons.
- Maintenance of onboard systems, including hydraulic and air conditioning systems.
- Painting of all bilges.
- Cleaning and modernization of hydraulic and sanitary systems.
- Restoration of the teak deck, replacing some planks and recaulking.
- Refurbishment of upholstery, mattresses, and shower box in the owner's cabin.

- Reupholstering of the sunbathing area and stern section.

In addition to the main interventions listed above, the vessel has benefited from regular maintenance before each season:

- Inspection and maintenance of the bilge pumps.
- Inspection of fans and ventilation systems.
- Check and replacement of onboard sensors, when necessary.
- Inspection of electrical and electronic systems.
- Check of internal and external lighting.
- Inspection of safety systems.
- Inspection of through-hull fittings and valves.
- Scheduled maintenance of engines and generators.
- Hull cleaning and replacement of anodes.

A complete list of works is available upon request.
